

THE CAT IN THE HAT KNOWS A LOT ABOUT THAT!™

SCIENCE EDUCATION WORKSHOPS FOR TEACHERS AND PARENTS OF YOUNG CHILDREN

Teaching science to preschoolers?! Young children have great capacities to learn science concepts and get engaged in doing science. Children are naturally curious about the world and how it works, and science learning for young children starts with wondering and asking questions.

Dr. Kim Storey will introduce you to *The Cat in the Hat Knows a Lot About That!™* and provide you with exciting ways to get young kids involved in science exploration.

This national PBS children's series, presented by KQED, uses Seussian wit and whimsy to spark a love of learning and a lively interest in science in preschool-aged children. Come view clips from the programs and watch the Cat in the Hat, along with his friends Sally and Nick, embark on science adventures, such as flying with birds to discover how and why they migrate or taking a snowcat to the Arctic to explore freezing and melting.

Come learn how the resources on the PBS websites provide young children, along with their families and teachers, with opportunities to explore the science ideas introduced in *The Cat in the Hat Knows a Lot about That!™* in their own homes, neighborhoods, and schools.

As KQED's Director and Creator of the Educational Resources for *The Cat in the Hat Knows a Lot About That!™*, Kim Storey designed the websites for parents and teachers.

Sign up your school or program now!
